## Memorandum:

TO: Mayor Fletcher and City Council Members

FROM: Ed Leier, Fire Chief *KLW*

DATE: April 5, 2017

SUBJECT: Approve specifications and authorize the purchase of a 2017 F-150 crew-cab, short box, gas pickup truck listed in the CIP 2017 budget for replacing the 2000 Ford F150.

### Background

The 2000 Ford F150 is used primarily by Fire Technicians as an emergency response vehicle, inspections and other fire department business as well as a utility vehicle to move staff/items such as hose, SCBA's, and equipment after calls. There have been issues recently with the current vehicle starting, and as an emergency response vehicle, this truck needs to be a reliable vehicle for our Fire Technicians.

Funding for this vehicle is proposed to come from the 2017 – CIP.

### Pricing

**Truck – \$38,321.76**

Purchase on State Bid through Midway Ford – F-150 crew cab short box gas

**Emergency Lighting/Siren – \$8,312.30**

Purchased through Emergency Automotive Technologies Inc.

Emergency lighting

Siren/controller unit

Shore-power system

Installation

Removal of usable equipment from the 2000 Ford F150 (U855)

**Graphics – \$595.00**

Purchased through Advanced Graphix (to match existing fleet)

**Total – \$47,229.06**

### **Current 2000 Ford F150 (Utility 855)**

There has been an ongoing issue for the last year where the truck will not start all of the time due to unfound electrical problems. We have made multiple attempts to locate the cause with no success. Some other notable concerns with our current truck is the growing rust and corrosion from being 17 years old. The rocker panels,

Edward.leier@cityvadnaisheights.com

wheel wells, and the cross members are starting to rust and flake heavily. We had to replace a front brake line last year and we are continually monitoring the other brake lines in the system for corrosion and leaks. We have a muffler and catalytic converter that are starting to rust and vibrate when the truck is running.

This truck is utilized on a daily basis. During an emergency response, it is crucial to have reliable vehicles. A vehicle not starting or a catastrophic system failure during an emergency response could delay patient care or cause an accident and injuries to staff. This vehicle is on the Fire Department's Apparatus replacement schedule for this year. Increasing maintenance and repair costs along with depreciation of the trucks value make this an ideal time to replace this truck.

### **Process for removing 2000 Ford F-150 from service Trade-In**

We have been provided a trade-in evaluation from Midway Ford for the truck. The evaluation includes de-identifying the truck by Midway Ford. Midway Ford has made an offer of \$3,000.00 for the 2000 Ford F-150. Researching on Kelley Blue Book, we found that the truck is estimated to bring \$3,251.00 – \$4,060.00 as a trade-in. This option would involve no additional staff time.

### **Sell at Auction**

Kelley Blue Book also provided a private party sale estimate of \$5,043.00 for the truck in fair/good condition. To auction a vehicle, the seller must identify currently known deficiencies. The deficiencies know on this truck will lower the estimated high-end sale price of \$5,043.00. This option would also require additional costs of \$150 for de-identification and auction fees of roughly \$400.00. This option would also require additional staff time to de-identify the truck and deliver the truck to these additional locations. The reduction in vehicle value due to deficiencies, the additional fees, and the additional staff time would make this option almost equal to the trade-in value from Midway Ford.

Based on our research, our recommendation is to trade-in the truck to Midway Ford. This option does not require additional staff time or additional cost to prepare the truck for sale.
